

## **Machine park overview**

# Our Machine park overview

3x Trumpf laser cutting systems • Laser cutting: steel up to 20mm; stainless steel up to 12mm; aluminum up to 8mm;

Laser tubes

1x Amada guillotine • Shear cut up to max. 4000mm and max. 8mm sheet thickness

1x straightening roller • straightening up to 1200mm width and max. 12mm material thickness

1x Amada press brake • Bending up to max.4000mm

1x LVD press brake • Bending up to max.3000mm

1x Trumpf punching nibbling machine

1x horizontal machining center Union T110-1 • (clamping area 1200x1000mm)

1x vertical processing center DMG DMC1150V • (processing area 1150x700mm)

2x vertical machining centers DMG DMC1450V • (machining area 1450x700mm)

# Our Machine park overview

1x vertical processing center DMG DMC1450V • (processing area 1450x700mm) with handling Automation (from 03/2022)

1x universal turning/milling center CLX450TC with bar loader and flexible workpiece loading and unloading system Robo2Go  
(from 02/2022)

1x 5-axis machining center DMG DMU 200 GANTRY • (clamping area 4000x2000mm)

2x vertical processing centers DMG CMX1100V with handling automation • (processing area 1100x530mm)

1x processing center DMG DMF260/7 • (processing area 2600x700mm)

- with additional swivel axis (B-axis)
- with rotary table Ø700mm, can be set up either horizontally or vertically

2x conventional lathes • turning up to 800x2000mm

1x Loewer deburring machine DiskMaster 4TD-1500 - 1x Loewer brushing machine Diskmaster SF 2/2-1000
